Geographic Variation in Gender Gaps- Replicated

- Among females, percent employment is similar between the CZs across the distribution of parent household income.
- The gaps between females and males are more pronounced in Charlotte for low-income parents.

Figure 1: Children's Employment Rates by Gender and Parent Income Quintile: New York vs. Charlotte CZs

Geographic Variation in Gender Gaps

- Among females, percent employment is slightly higher in Bridgeport across the parent income distribution.
- The gaps between females and males are much more pronounced in Bridgeport for low/middle-income parents.

Figure 2: Children's Employment Rates by Gender and Parent Income Quintile: Boston vs. Bridgeport CZs

Geographic Variation in Gender Gaps

- Among females, percent employment is slightly higher in Bridgeport across the parent income distribution.
- The gaps between females and males are much more pronounced in Bridgeport for low/middle-income parents.
